

## PART THREE: ACCOMMODATION AND OFFICE FACILITIES

[View in Summary](#)

### 3.10 Software Reimbursement

In addition to the software provided to electorate offices, Senators and Members may claim reimbursement from their office budget for specific software, servicing, back-up and training.<sup>1</sup> Claimants must provide Ministerial and Parliamentary Services with a tax invoice and evidence of payment from a computer software provider which specifies in writing the software purchased and the servicing, backup and training which may be included in the package. The major political parties have each nominated a single software provider and reimbursement will only be made for purchases through that provider. Reimbursement details will appear in the Senator or Member's monthly management report.
